How to Use OIT Remote Labs

1. Establish a connection to the Campus
   - **On Campus:** Connect to Comet Net
     - Please visit the How to Page: https://www.utdallas.edu/oit/how-to/cometnet/
     - For assistance.
   - **Off Campus:** Connect to the VPN (Global Protect)
     - Download Global Protect, then sign into the VPN.
     - Please visit the How to Page: utdallas.edu/oit/howto/vpn/
     - For assistance.

2. Install Remote Desktop on your device
   - **Windows Devices:** Download Remote Desktop Connection from Microsoft.com
     - Remote Desktop Connection is usually installed on all Windows systems by default.
   - **Apple Devices:** Download Windows Remote Desktop 10 from the App Store

3. Go to: [https://remoteaccess.labstats.com/OITLabs](https://remoteaccess.labstats.com/OITLabs)
   - Select Connect on any machine listed and a .rdp file will begin to download. Open the file with Remote Desktop Connection and select Connect on the next window.
   - When prompted, sign in with your UTD NetID Credentials using one of the formats listed below as your username:
     - `CAMPUS|yourNetID`
     - `campus.ad.utdallas.edu\yourNetID`
   - Note: If you use multiple accounts or personal accounts on your computer make sure to select More Choices at the bottom to login with your UTD Credentials.

4. How to Sign Out or Disconnect
   1. To Sign Out, select the Start Menu at the bottom left of the screen.
   2. Click on the Profile Icon.
   3. Select Sign Out.
