This class consisted of going over the pertinent files and using them to talk about the evolution of ideas across a career.

What skills and behaviors at school only help to ensure school success?

1. What skills and behaviors predict success?

2. What skills and behaviors, if augmented in, say, preschool, would boost success?

In terms of quantitative analysis:

Achievement composite = a + b, Early academic + b, Behaviors at, say, grade 5

What bias stories compromise internal validity?
