COMP: Study groups

David Clausen & John Peca-Medlin

October 9, 2020
Virtual Grad School

- It’s new.
Virtual Grad School

- It’s new.
- It’s not easy.
Virtual Grad School

- It’s new.
- It’s not easy.
- We’re all doing it now.
Virtual Grad School

- It’s new.
- It’s not easy.
- We’re all doing it now.
- So let’s do it together.
Create Study Groups for Remote Learning

- Create a shared online collaborative environment using whatever you think is helpful (e.g., Slack, Discord, Overleaf)
Create Study Groups for Remote Learning

- Create a shared online collaborative environment using whatever you think is helpful (e.g., Slack, Discord, Overleaf)
- Asynchronous groups can work on homework together
Create Study Groups for Remote Learning

- Create a shared online collaborative environment using whatever you think is helpful (e.g., Slack, Discord, Overleaf)
- Asynchronous groups can work on homework together
- Synchronous study sessions can work together through the shared environment or tools
Let’s use an Algebra qualifying exam study group setup as an example.
Let’s use an Algebra qualifying exam study group setup as an example.

- Set up a Slack channel dedicated to this exam.
Let’s use an Algebra qualifying exam study group setup as an example.

- Set up a Slack channel dedicated to this exam. Use the Zoom app integration to launch Zoom meetings within Slack, and use the \LaTeX{}in Slack plugin in Chrome to embed math in Slack conversations.
Let’s use an Algebra qualifying exam study group setup as an example.

- Set up a Slack channel dedicated to this exam. Use the Zoom app integration to launch Zoom meetings within Slack, and use the \texttt{\LaTeX} in Slack plugin in Chrome to embed math in Slack conversations.
- Invite anyone that is interested in studying together.
Let’s use an Algebra qualifying exam study group setup as an example.

- Set up a Slack channel dedicated to this exam. Use the Zoom app integration to launch Zoom meetings within Slack, and use the \LaTeX in Slack plugin in Chrome to embed math in Slack conversations.
- Invite anyone that is interested in studying together.
- Create a shared Overleaf file that everyone can work on writing solutions to a given qual exam at the same time.

Attend/sync studies with the existing Algebra qual prep course led by Shichen this quarter.
Let’s use an Algebra qualifying exam study group setup as an example.

- Set up a Slack channel dedicated to this exam. Use the Zoom app integration to launch Zoom meetings within Slack, and use the \LaTeX\text{in Slack} plugin in Chrome to embed math in Slack conversations.
- Invite anyone that is interested in studying together.
- Create a shared Overleaf file that everyone can work on writing solutions to a given qual exam at the same time
- Attend/sync studies with the existing Algebra qual prep course led by Shichen this quarter
Other suggestions

- Have someone designated as the leader of the group for organizing the study group. You can alternate who is the leader every week.
- For homework, try to at least look at every problem and have an idea of how to attack the problem.
- It is never too early to start studying for qualifying exams, so put your solutions for qual problems on a shared overleaf/whatever for your study group. That way you do not have to re-solve the problem again in six months.
- For Spring quals: starting in the winter, try and go through a qual a week.
