5 Tips for Successful Virtual Speeches

1. Present your speech in an area with a fairly neutral background and no distractions.

2. Make sure that you are in a well-lit area (natural lighting is usually best when filming).

3. While speaking, look into the camera instead of the screen. This will make the audience feel like you are making eye contact with them. You may occasionally look down to check your speech notes.

4. Dress professionally to help you feel more productive and confident during your presentation.

5. Be prepared and practice your speech several times before presenting for your audience.
