Wifi access for TxACE-SRC Annual Symposium and Review  Oct. 17 -> 20, 2022

Wifi access is provided through a dedicated access point named “txace-src”

→ To access this site, first start your web browser,
→ then select “txace-src” from the following list of access points

Once connected, you will get the following pop-up webpage, enter your email-address, and click “Accept”

--> no userID or password is required
Note1: “txace-src” access point will not time out during the day.
Note2: “txace-src” is available throughout the Gundy Auditorium and Jindal School of Management buildings.
Note3: if you visit other parts of the UTD campus, you can use the “UTDGuest” access point or “eduroam”
Note4: the “UTDGuest” access-point will time-out after 4 hours.
Note5: “txace-src”, “UTDGuest” and “eduroam” provide no additional security above default 802.11x security
Note6: if you need secure internet access over “txace-src”, “UTDGuest” or “eduroam” then you should use VPN

Cell phone WiFi access

--> the procedure is the same for cell phone WiFi access
--> Following is a screen shot from my Android cell phone, → select “txace-src”

Once my phone connected, it tried to go my default(external) webpage (google.com) and could not access.

But, then I entered www.utdallas.edu, and it redirected to the “Guest WiFi” page, and then I was able to enter my email address and click “Accept”. After that, my Android phone was connected to “txace-src”.

Any questions, email me at steve.martindell@utdallas.edu
