ABOUT CORNELL UNIVERSITY 15
On behalf of the Cornell SC Johnson College of Business and Cornell University’s Emerging Markets Institute and its Institute for China Economic Research, we are pleased to welcome you to the virtual 5th Annual Global Strategy and Emerging Markets (GSEM) Conference. We are proud to partner again with the University of Texas at Dallas Center for Global Business, Northeastern’s Center for Emerging Markets and Simon Fraser University’s Jack Austin Centre for Asia Pacific Business Studies. The conference brings together seasoned and more junior scholars, PhD students as well as practitioners to share research on global strategy, but with a special focus on emerging markets.

Our Cornell colleagues, Lourdes Casanova and Christopher Marquis, together with Mike Peng, Ravi Ramamurti, and Daniel Shapiro, have assembled a first-class program that features research papers on the topic of digital technology transformation for emerging markets. The papers focus on how digital technology is affecting competitive strategy of multinational firms as well as the market for corporate control through mergers, acquisitions, strategic alliances, and joint ventures. Some fascinating new studies will be presented on entrepreneurship linked to digital technologies, product market innovation, initial public offerings, and venture capital financing in emerging markets. Yet another set of research papers will focus on how digital technologies will disrupt organizational structures, supply-chain relationships among competitors, suppliers, and customers. We will undoubtedly experience a vibrant exchange on topical ideas.

This year, we will celebrate the 10th anniversary of the launch of our College’s Emerging Markets Institute (EMI). It was a project that came to fruition thanks to the strong support of our alumni and MBA students in the Johnson Graduate School of Management, who saw the acute need to train future leaders for the special challenges of doing business in emerging markets. While Dean Andrew Karolyi and Dr. Ya-Ru Chen were there to launch EMI as founding directors, Dr. Casanova, EMI’s Gail and Roberto Canizares Executive Director, has taken the mission of the institute to the next level with innovative thought leadership and an active emerging market fellows program with alumni spanning the world. Cornell’s Institute for China Economic Research (CICER) is a bit younger than EMI, but no less vital, involving dozens of faculty members across six colleges—Cornell is truly an intellectual powerhouse on China research.

None of the success of a conference like GSEM happens without support from volunteer staff, PhD students, visiting students affiliated with EMI/CICER, and the Cornell SC Johnson College of Business, as well as the leadership team of GSEM from UT Dallas, Northeastern, and SFU. To them we owe a special debt of gratitude for the extra work needed to make this 5th annual conference, being a virtual one, successful. Best wishes for a successful GSEM conference!

Kevin Hallock, Dean, Cornell SC Johnson College of Business, Joseph R. Rich Professor of Economics and Human Resource Studies
Andrew Karolyi, Deputy Dean and Dean of Academic Affairs, Cornell SC Johnson College of Business, Harold Bierman, Jr. Distinguished Professor of Management
Hello, Everyone,

On behalf of the Cornell University community, we want to offer you a warm welcome to the Fifth Annual Global Strategy and Emerging Markets Conference!

We are delighted to see that scholars, students, and practitioners are converging at our Emerging Markets Institute (EMI). Led by Professors Lourdes Casanova, our EMI has emerged as a nucleus for international business education and research, with a particularly strong emphasis on global strategy and emerging markets.

To make the conference a success, we appreciate the contributions from co-sponsor schools - Northeastern University, Simon Fraser University, and University of Texas at Dallas. We also are grateful to other contributing organizations, such as the Society for the Advancement of Management Studies, Durham, U.K. In closing, we offer you our own and the Cornell SC Johnson College of Business's best wishes for a successful conference.

Sincerely,
Lourdes Casanova, Christopher Marquis,
Ravi Ramamurti, Mike Peng, & Daniel Shapiro
Cornell University’s Emerging Markets Institute (EMI), the Cornell Institute for China Economic Research (CICER), and partners — Northeastern University Center for Emerging Markets (CEM), The Simon Fraser University Jack Austin Centre For Asia Pacific Business Studies, and The University of Texas at Dallas Center for Global Business (CGB) — are pleased to announce the fifth annual Global Strategy and Emerging Markets (GSEM) Conference. Previous GSEM conferences have been held in Miami (2016), Boston (2017), Miami (2018) and Dallas (2019).

This conference provides a platform to bring together senior and junior scholars, doctoral students, and practitioners in the fields of international business, strategic management, cross-cultural management, technology strategy, and global entrepreneurship with shared interests in global strategy, emerging markets, and emerging market multinationals.

The theme of GSEM 2020 is “Competing in the Digital World.” Digital technologies—including internet of things, 5G, cloud computing, AI, big data, and other new information technologies—are profoundly influencing the global economy by reshaping the rules of competition, generating new business models and enabling innovative ecosystems. Digital technologies are creating new business opportunities for emerging markets to improve their competitiveness and in some instances to leapfrog existing business practices and become world leaders.

How does digitalization affect firms’ competitive strategy, competitive dynamics, M&As, strategic alliances and joint ventures?

How does digitalization affect international business activities, e.g., multinational enterprises, FDI and cross-border and trade activities?

How does digitalization affect organizational learning, knowledge creation, and firms’ internal integration of knowledge?

What is the relationship between digitalization and innovation?

How do digitalization and other information technologies affect agricultural production and/or environmental sustainability?

How do digital technologies affect entrepreneurship, e.g., opportunity discovery versus creation, market failure and uncertainty, and entrepreneurial financing (by venture capitalists, IPO, etc.)?

How do digital technologies influence cross-cultural management, e.g., how these technologies affect cultural orientations and practices of managers and other organizational members, individual values and cognitive structures?

What are implications of digitalization on firms’ economic systems (e.g., interorganizational network, their relationship with competitors, suppliers, and customers) and business models?

How do digital technologies redefine firms’ boundary and affect organizational structure and design (e.g., non-hierarchical organizations)?

How does digitalization contribute to existing management theories (e.g., by questioning, modifying, and adding new assumptions) or advancing new ones (e.g., by asking and answering new questions)?

End of Day 2. Thank you for attending the 5th Annual GSEM Conference.

Day 2 Plenary Session Virtual Room
Acknowledgements

The 5th Annual GSEM conference is made possible through collaboration across universities, disciplines, and countries. We’d like to acknowledge our co-sponsor schools: The University of Texas at Dallas, Simon Fraser University, and Northeastern University. A big thank you also to The Society for the Advancement of Management Studies in Durham, U.K. for their generous support, and to the EMI team, Vritika Patni, Mihika Badjate, Kunyuan Qiao, and Mark K. Yeager for their tireless efforts in making the event a success.
Cornell is a privately endowed research university and a partner of the State University of New York. As the federal land-grant institution in New York State, we have a responsibility—unique within the Ivy League—to make contributions in all fields of knowledge in a manner that prioritizes public engagement to help improve the quality of life in our state, the nation, the world.

Cornell’s Emerging Markets Institute at the Samuel Curtis Johnson Graduate School of Management provides thought leadership on the role of emerging markets—and emerging market multinationals—in the global economy. The Institute brings together preeminent practitioners and academics from around the world to develop the next generation of global business leaders and create the premier research center on the role of emerging markets in the global economy.

Cornell is an intellectual powerhouse on China research. Cornell Institute for China Economic Research (CICER) serves as a hub for Cornell expertise on China’s economy. Through education, research, and policy engagement, the institute contributes to Cornell’s internationalization efforts by bringing Cornell to China and China to Cornell. The institute is being recognized as the go-to-place for expertise on China’s economy both inside and outside Cornell.
