Beyond a Business School Education

The Jindal School’s success teaching tomorrow’s leaders is a combination of relevant curriculum reflecting an ever-changing global business environment, vital research initiatives and real-world experiences for students. We offer over thirty programs, including five MBA formats and six areas of study for PhD candidates. Our Executive Education department boasts eleven master’s programs along with an array of academic and professional certificates.

Announcing Business Analytics for Undergrads

With a higher-than-average job growth rate for analytics positions expected to continue through the next decade, the new undergraduate degree in Business Analytics prepares professionals to solve data and statistics problems embedded in a business context. Completing the degree requirements will empower students to seek analytical roles by combining fundamental ideas in economics, finance, information technology, marketing, operations management, and statistics with various analytics concepts using various tools and programming languages.

Well-Rounded World Citizens

The Jindal OutREACH program connects undergraduate students with local nonprofit organizations to apply their skills to real-life problems and shape them as cause-minded business citizens of the future. The students provide 100 hours of service before they graduate. Even in the face of COVID-19 restrictions, students completed 37,000+ volunteer hours in the 2020-2021 academic year. The total value of those hours served to the Dallas-Fort Worth community is $1,077,862.

New Dimensions Campaign

Announced in May 2020, The New Dimensions campaign aims to build upon a half-century of momentum, propelling UT Dallas’ growth and success through the next 50 years and beyond. Each gift toward our $750 million-goal will directly support the needs of exceptional students, facilitate the enterprising work of our faculty and realize the possibilities that exist when world-class researchers and visionary artists share a home.
