The graduate program in Humanities brings together scholars from history, philosophy, literature, creative writing, art history, film studies, and the performing arts who share a commitment to transnational and interdisciplinary approaches to humanistic study and practice.

**Program Description**
The PhD in Humanities requires 60 semester credit hours minimum. Students must also demonstrate proficiency in a foreign language and complete an academic or creative dissertation.

The PhD in Humanities degree program is designed primarily for individuals who wish to conduct advanced research and to teach at the college level, but it is open to qualified candidates who wish to enhance fully their knowledge and skills. The program provides students with a flexible, interdisciplinary context within which to pursue their studies, built on connections among specific courses and areas of interest. Each student plans an individual program of studies in consultation with an assigned advisor.

For complete admission and degree requirements, view the Graduate Catalog at [catalog.utdallas.edu](http://catalog.utdallas.edu).

**Career Opportunities**
Graduates of the program seek positions such as: teacher/educator, researcher, administrator, archivist, writer, museum curator, non-profit management and other positions in research or professional practice. Career settings may include higher education, non-profits, cultural and historical organizations, government agencies, international development organizations, publishing houses, museums and archives, business/corporate entities and independent consulting.

**Marketable Skills**
Upon successful completion of the PhD in Humanities, students will have attained advanced knowledge and skills for the study of history, philosophy, literature, visual and performing arts and their intersection. They will be able to pursue research at a high level of quality and teach in the areas of their expertise at any level.

- Mastery of complex bodies of knowledge
- Advanced research skills
- Ability to produce new knowledge
- Professional skills and networking
- Verbally defending complex arguments
- Experience constructing extended narratives and arguments
- Understanding how presentation methods should shift according to audience

The School of Arts and Humanities emphasizes education that seeks and creates connections, combining critical with creative thought, theory with practice and arts and humanities with other fields of knowledge. Our goal is to foster in students intense curiosity informed by rigorous attention and the ability not only to solve challenging problems but also to communicate the process and importance of the solution.

Our graduate programs provide students with a flexible, interdisciplinary context in which to pursue a personalized course of study. Rather than identifying fixed disciplinary areas, we have designed our graduate degrees around broadly defined areas of interest. The interrelationship and mutual influence of these broad areas is emphasized as the essential aspect of our approach to graduate education.

The School of Arts and Humanities offers the advantages of a research university and the nurturing atmosphere of a liberal arts college. Students in the School of Arts and Humanities are encouraged to explore the boundaries and the interrelationships of the major fields of study within the school. Consistent with this focus on the integration of the arts and humanities and a commitment to interdisciplinary education, the school has no conventional departments. Rather, its curriculum is designed to allow study that crosses and transcends traditional disciplinary lines. This flexible design allows faculty members to create learning communities based on mutual interests and in response to the educational needs of students.

Additional Facts
Several faculty members have been awarded prestigious fellowships, including those from the Guggenheim, Fulbright, Alexander S. Onassis and Woodrow Wilson foundations. Others are recipients of the Füst Literary Award, as well as awards from the National Endowment for the Arts and the National Endowment for the Humanities.

The school’s centers further enhance students’ educational experience by bringing the concept of globalism to campus, by bringing world events into focus through research and by encouraging innovation and creativity.

The National Science Foundation recently awarded a major grant to the school’s Center for Values in Medicine, Science and Technology to study the mentoring and education that occurs in science laboratories.
The School of Arts and Humanities has several centers that provide a foundation for growth both internally and throughout the community:

**The Ackerman Center for Holocaust Studies**
furthers contemporary attempts at understanding, speaking about, interpreting and representing this difficult period in history.

**The Center for Asian Studies**
is a hub for Asian scholarly study and cultural fluency. The center is devoted to Asian and Asian-American culture and the interaction of Asia with America.

**The Center for Translation Studies** has a broad mission: enhancing the visibility and establishing the importance of the translator as the most important mediator between cultures; supporting the scholarly analysis and creation of literary translations; establishing partnerships with writers, scholars and publishers around the world.

**The Center for U.S.-Latin America Initiatives (CUSLAI)**, reflects the importance of Latin America to the United States and, specifically, to the northern portion of Texas, in the context of historical mutual understanding and co-existence. CUSLAI offers exchange opportunities for U.S. and Latin American scholars, researchers and students in science, technology, management, social sciences, arts and humanities.

**The Center for Values in Medicine, Science and Technology** supports programs and projects that address the human implications of scientific investigation and technological innovation.

**The Edith O’Donnell Institute of Art History** is a center for innovative research and graduate education in the history of art. Research and teaching at the O’Donnell Institute focus on artworks held in Dallas-Fort Worth collections, which together open onto a history of art that ranges across geography, chronology and medium. The O’Donnell Institute is dedicated to intellectual creativity, exchange and collaboration in the form of lectures and symposia, exhibitions, publications and collaborations with area institutions.
